DETAILED ACTION

The following action is in response to communications filed for application 10/623,175 on August 25, 2004.

Election/Restrictions

Claims 9-11 and 20-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on August 25, 2004.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1, 3, 12, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Ito.

With regard to claims 1 and 12, Ito teaches an idle speed control system for a vehicle including an internal combustion engine 1 coupled to an automatic transmission 40 which has a torque converter PP27, the idle speed control system comprising: a sensor operative to detect a parameter based on a torque converter speed ratio and generate a signal indicative of the parameter detected 207; and a controller programmed to: determine basic idle speed NETi; and determine a target idle speed NET by correcting the basic idle speed based on the signal when the automatic transmission is in a drive range 205 in engine idling condition 201. With regard to claims 3 and 14, Ito teaches the control, wherein the parameter is a vehicle speed SPD.

Claim 1, 6, 12, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Melbourne. With regard to claims 1 and 12, Melbourne teaches an idle speed control system for a vehicle including an internal combustion engine coupled to an automatic transmission which has a torque converter (Col. 1), the idle speed control system comprising: a sensor operative to detect a parameter based on a torque converter speed ratio and generate a signal indicative of the parameter detected 30; and a controller programmed to: determine basic idle speed 34; and determine a target idle speed 36 by correcting the basic idle speed based on the signal when the automatic transmission is in a drive range 2 in engine idling condition. With regard to claims 6 and 17, Melbourne teaches the control, wherein the controller is programmed to determine a plurality of correction values for correcting the basic idle speed which correspond to different values of the basic idle speed (Col. 6).

Allowable Subject Matter

Claims 2, 4-5, 7-8, 13, 15-16, and 18-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3681

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Watanabe, Shibuya, Tolkacz, Mashiki, Doering, and Aldrich have been cited to show similar idle controls.

FACSIMILE TRANSMISSION

Submission of your response by facsimile transmission is encouraged. Group 3600's facsimile number is (703) 305-3597. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence not permitted by facsimile transmission, see MPEP 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check should not be submitting by facsimile transmission separately from the check.

Art Unit: 3681

Responses submitted by facsimile transmission should include a Certificate of Transmission (MPEP 512). The following is an example of the format the certification might take:

I hereby certify that this correspondence is being facsimile transmitted to the Patent and Trademark Office (Fax No. (703) 305-3597) on _____ (Date)

Typed or printed name of person signing this certificate:

(Signature)

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and MPEP 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roger L Pang whose telephone number is 703-305-0445. The examiner can normally be reached on 5:30am to 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on 703-308-0830. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
